#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. Claims 1-21 are in the application.

#### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 17, line 2, there is no proper antecedent for “acute angle”.

Claims 17, 18, and 19 are the same as claims 2, 4, and 7 respectively. This duplication of claims makes these claims indefinite.

#### *Claim Rejections - 35 USC § 102*

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 7, 8, 14-19 and 21 are rejected under 35 U.S.C. 102b as being anticipated by Frederick (3,159,131).

Frederick discloses a hull including a plurality of flaps 58. Each flap has a forward edge with a hinge 60, a rear edge and a body portion. The flaps are movable between a first position and a second position. The flaps have their forward edge and the rearward edge located between the bow and the stern of the hull.

Frederick also discloses the use of an actuating mechanism 82 adapted to engage the flap at the rear edge. The flaps include a housing 24.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frederick (3,159,131) in view of Weiler (3,463,109).

Weiler discloses a flap system similar to that of Frederick. Frederick uses a manual threaded actuator. Weiler teaches the use of hydraulic means including a piston and a cylinder. In view of these disclosures, it would have been obvious to one having ordinary skill in the art at the time of the invention to substitute for the actuator of Frederick with an actuator generally as taught by Weiler. The use of the hydraulic system of Weiler would have been desirable as the controls thereof can be placed in a location close to the other boat controls.

***Allowable Subject Matter***

7. Claims 9-13 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weber (3,496,899) disclose flap controls on a boat. Osawa et al (5,088,433) and Kercheval (3,589,323) disclose a watercraft with a plurality of flaps.
